

Take a Vacation from your Finances

Paying yourself automatically.

Put yourself at the top of your "payee" list. Regular automatic deductions from your paycheck or bank account into a savings, investing or retirement account will keep you on track toward your short and long-term financial goals.

Commit to save as much as you can each month, but if you don't feel like you have a lot to save, start small. Find a way to save even just \$25 a month towards your retirement goals.

If you set up an automatic deduction, it will not feel as much like you are "missing" money as it does when you cash your check and then transfer money to a savings.

Want to know where your automatic savings should go? We have tips for each decade of your life!
